<b>Preface</b>	<b>ix</b>
----------------	-----------

<b>1 Vector Spaces</b>	<b>1</b>
------------------------	----------

1.1	Introduction . . . . .	1
1.2	Vector Spaces . . . . .	6
1.3	Subspaces . . . . .	16
1.4	Linear Combinations and Systems of Linear Equations . . . .	24
1.5	Linear Dependence and Linear Independence . . . . .	35
1.6	Bases and Dimension . . . . .	42
1.7*	Maximal Linearly Independent Subsets . . . . .	58
	Index of Definitions . . . . .	62

<b>2 Linear Transformations and Matrices</b>	<b>64</b>
--	-----------

2.1	Linear Transformations, Null Spaces, and Ranges . . . . .	64
2.2	The Matrix Representation of a Linear Transformation . . . .	79
2.3	Composition of Linear Transformations and Matrix Multiplication . . . . .	86
2.4	Invertibility and Isomorphisms . . . . .	99
2.5	The Change of Coordinate Matrix . . . . .	110
2.6*	Dual Spaces . . . . .	119
2.7*	Homogeneous Linear Differential Equations with Constant Coefficients . . . . .	127
	Index of Definitions . . . . .	145

<b>3 Elementary Matrix Operations and Systems of Linear Equations</b>	<b>147</b>
---	------------

3.1	Elementary Matrix Operations and Elementary Matrices . . .	147
-----	--	-----

---

\*Sections denoted by an asterisk are optional.

3.2	The Rank of a Matrix and Matrix Inverses . . . . .	152
3.3	Systems of Linear Equations—Theoretical Aspects . . . . .	168
3.4	Systems of Linear Equations—Computational Aspects . . . . .	182
	Index of Definitions . . . . .	198

## 4 Determinants 199

4.1	Determinants of Order 2 . . . . .	199
4.2	Determinants of Order $n$ . . . . .	209
4.3	Properties of Determinants . . . . .	222
4.4	Summary—Important Facts about Determinants . . . . .	232
4.5*	A Characterization of the Determinant . . . . .	238
	Index of Definitions . . . . .	244

## 5 Diagonalization 245

5.1	Eigenvalues and Eigenvectors . . . . .	245
5.2	Diagonalizability . . . . .	261
5.3*	Matrix Limits and Markov Chains . . . . .	283
5.4	Invariant Subspaces and the Cayley–Hamilton Theorem . . . . .	313
	Index of Definitions . . . . .	328

## 6 Inner Product Spaces 329

6.1	Inner Products and Norms . . . . .	329
6.2	The Gram–Schmidt Orthogonalization Process and Orthogonal Complements . . . . .	341
6.3	The Adjoint of a Linear Operator . . . . .	357
6.4	Normal and Self-Adjoint Operators . . . . .	369
6.5	Unitary and Orthogonal Operators and Their Matrices . . . . .	379
6.6	Orthogonal Projections and the Spectral Theorem . . . . .	398
6.7*	The Singular Value Decomposition and the Pseudoinverse . . . . .	405
6.8*	Bilinear and Quadratic Forms . . . . .	422
6.9*	Einstein’s Special Theory of Relativity . . . . .	451
6.10*	Conditioning and the Rayleigh Quotient . . . . .	464
6.11*	The Geometry of Orthogonal Operators . . . . .	472
	Index of Definitions . . . . .	480

7 Canonical Forms

482

7.1	The Jordan Canonical Form I . . . . .	482
7.2	The Jordan Canonical Form II . . . . .	497
7.3	The Minimal Polynomial . . . . .	516
7.4*	The Rational Canonical Form . . . . .	524
	Index of Definitions . . . . .	548

Appendices

549

A	Sets . . . . .	549
B	Functions . . . . .	551
C	Fields . . . . .	552
D	Complex Numbers . . . . .	555
E	Polynomials . . . . .	561

Answers to Selected Exercises

571
